King County Flood Plan Update

Pricilla Kaufmann, and Nancy Faegenburg: Pricilla Kaufmann, King County River and Floodplain Management Project Manager outlined the proposed 2013 update to the Flood Hazard Management Plan. The goals of this year's plan is to reduce flood risks, minimize environmental impacts and manage costs.

Nancy Faegenburg, King County Cedar/Sammamish/Issaquah Watershed Project Manager, discussed details of the Cedar River Watershed and past flood events. Flood risk focus includes the city of Renton, local area roads and bridges, Cedar River Trail and the co-located fiber optic cable along its easement, and threatened rural and residential properties. Many Cedar River flood control measures, such as rock revetments, built in the '60s and '70s are in need of repair or replacement. There are far more needs than funds available. The Flood Hazard Management Plan update will be released for Public Comment in the Spring.

Ravensdale Park Update

Gordon Moorman: Gordon Moorman (former council member) and Rob Nist (of Rock Creek Sports) reported on Ravensdale Park.

Council Business

Peter Rimbos reported that he and Susan Harvey sent a letter to KCC concerning their "Demonstration Projects." Ballot Surveys: Susan and Rob presented the last rendition of the survey and are asking for any final changes to be sent in soon.

Meeting adjourned 10:05 PM
